Special Note on the use of AI such as ChatGPT

Unless your instructor includes instruction on acceptable usage of ChatGPT or a similar A.I. product in the course, your use of artificial intelligence for writing any part of an assignment will be considered academic fraud, and you will risk being removed from the program. It is our sincere hope that you understand the connections between reading, writing, and learning. Writing about something helps build neural pathways that aid you in connecting your new knowledge within the context of knowledge you've already learned. Skipping this step and using something written by AI or by another person means you are cheating yourself out of learning. Please be responsible and ethical in your coursework, and please submit your writing.

Academic Grievance Policy

If a student believes that he or she has reason to question the decision of a faculty member with regard to the final grade received in a course or the denial of academic progression, a procedure has been established to resolve the grievance.

The student must initiate the written Academic Grievance Appeal within five business days after notification of the final grade in Pipeline or notification of denial of academic progression.

In cases of both course grade and academic progression appeals, students are encouraged to first engage the involved faculty member in a good faith discussion (in person or via telephone or email) as the first step in resolving any concerns. If resolution is not achieved, a student may submit a written academic grievance by following [the policy outlined in the Harding University catalog](#). All students should be familiar with this policy.

Time Management Expectations

For every course credit hour, the typical student should expect to spend at least three clock hours per week of concentrated attention on course-related work, including but not limited to time attending class, as well as out-of-class time spent reading, problem-solving, reviewing, organizing notes, preparing for upcoming quizzes/exams, developing and completing projects, and other activities that enhance learning. Thus, for a three-hour course, a typical student should expect to spend at least nine hours per week dedicated to the course.

Dress Code: All members of the Harding community are expected to maintain standards of modesty and decency in dress appropriate to the Christian lifestyle and consistent with professional employment expectations. For these reasons, students are expected to adhere to an established dress code, as described in the Student Handbook, which faculty, staff, and administration will enforce. A student may be asked to leave class or other activities if they are not in keeping with these expectations.

Canvas or Internet Outages Policy: As a learner, you must be able to manage technical difficulties such as power outages, connection problems, and other technical issues. Technology will sometimes fail. For this reason, it is advisable to complete your assigned work before the due date.

Inclement Weather: If inclement weather prohibits your participation in any element of this course, prompt communication with me is expected. Your safety is my primary concern. We will handle any instances that arise on a case-by-case basis.
