

Figure 4-4: Placement Rates by Degree Categories

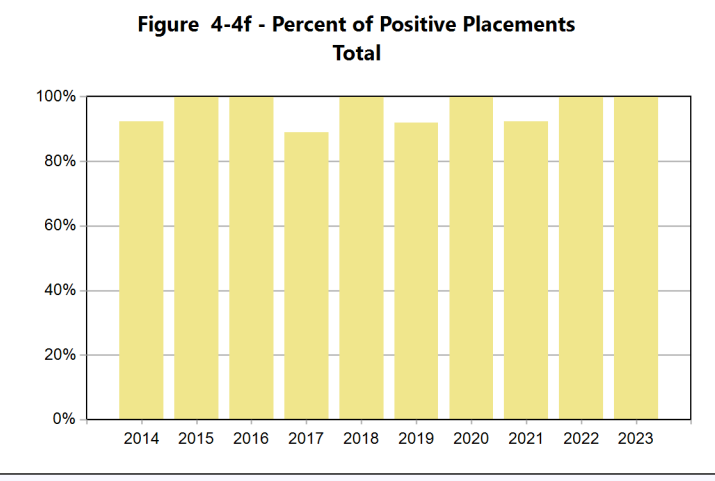

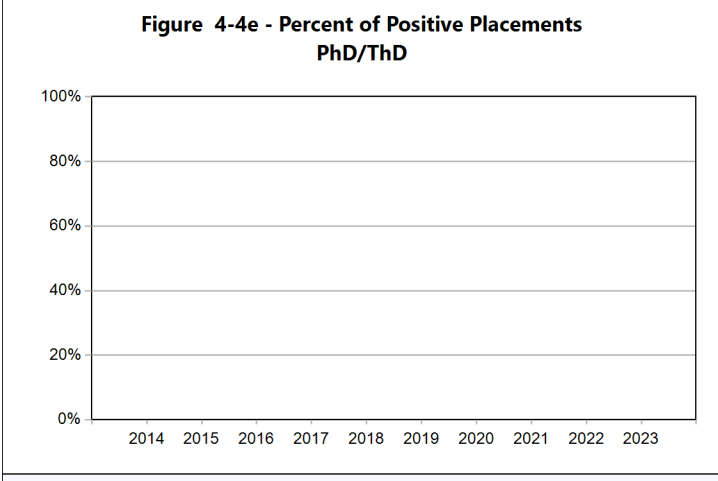

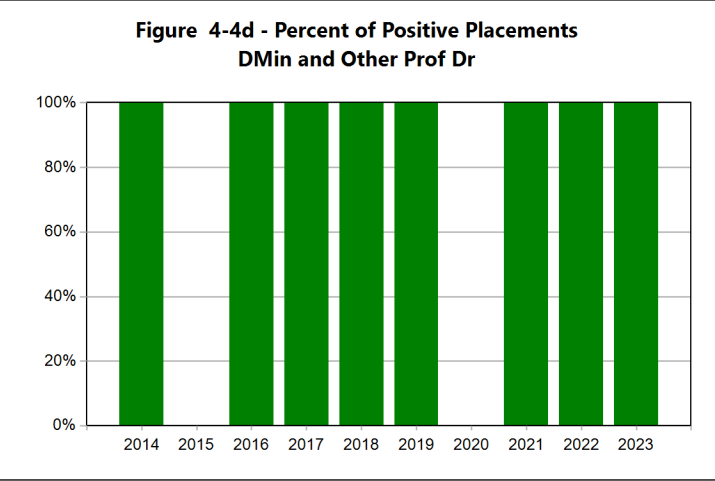

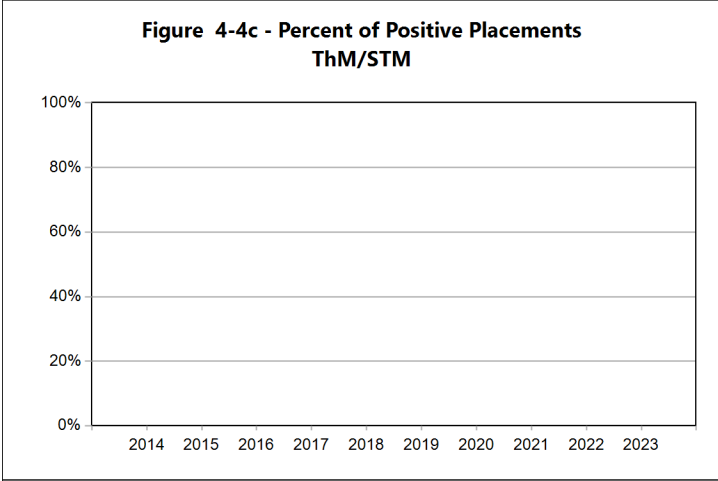

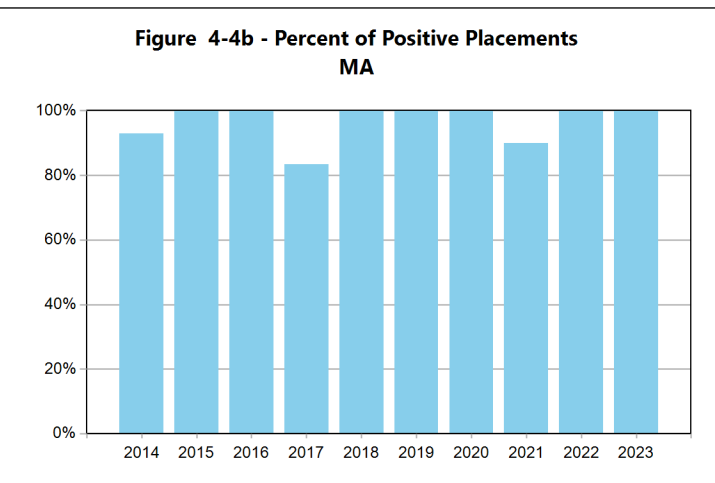

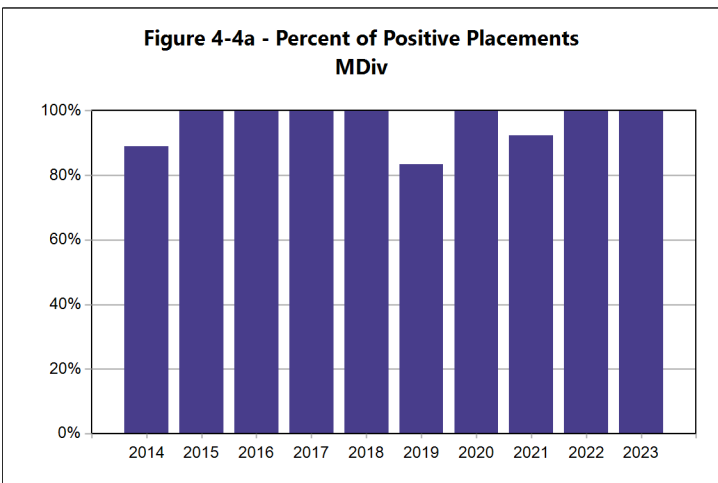

Figure 4-4a through 4-4f show the percentage of graduates that *within one year of graduation* either received a vocational placement, received a non-vocational placement, or went on for further study. Positive rates can be an important measure of your school's mission because they reflect the percentage of your graduates actually using their degrees in ministry, non-ministerial work, or further study. This data was first collected in 2012.

Your overall placement rate for 2023 was 100%

Your placement rate compares to the following:

| | | | | | | | |
|-----------------|-----|---------------------|-----|------------------|-----|---------------------------------|-----|
| All ATS Schools | 90% | Evangelical Schools | 90% | Mainline Schools | 88% | Roman Catholic/Orthodox Schools | 92% |
|-----------------|-----|---------------------|-----|------------------|-----|---------------------------------|-----|
