

## Figure 4-5: Graduation Rates by Degree Categories

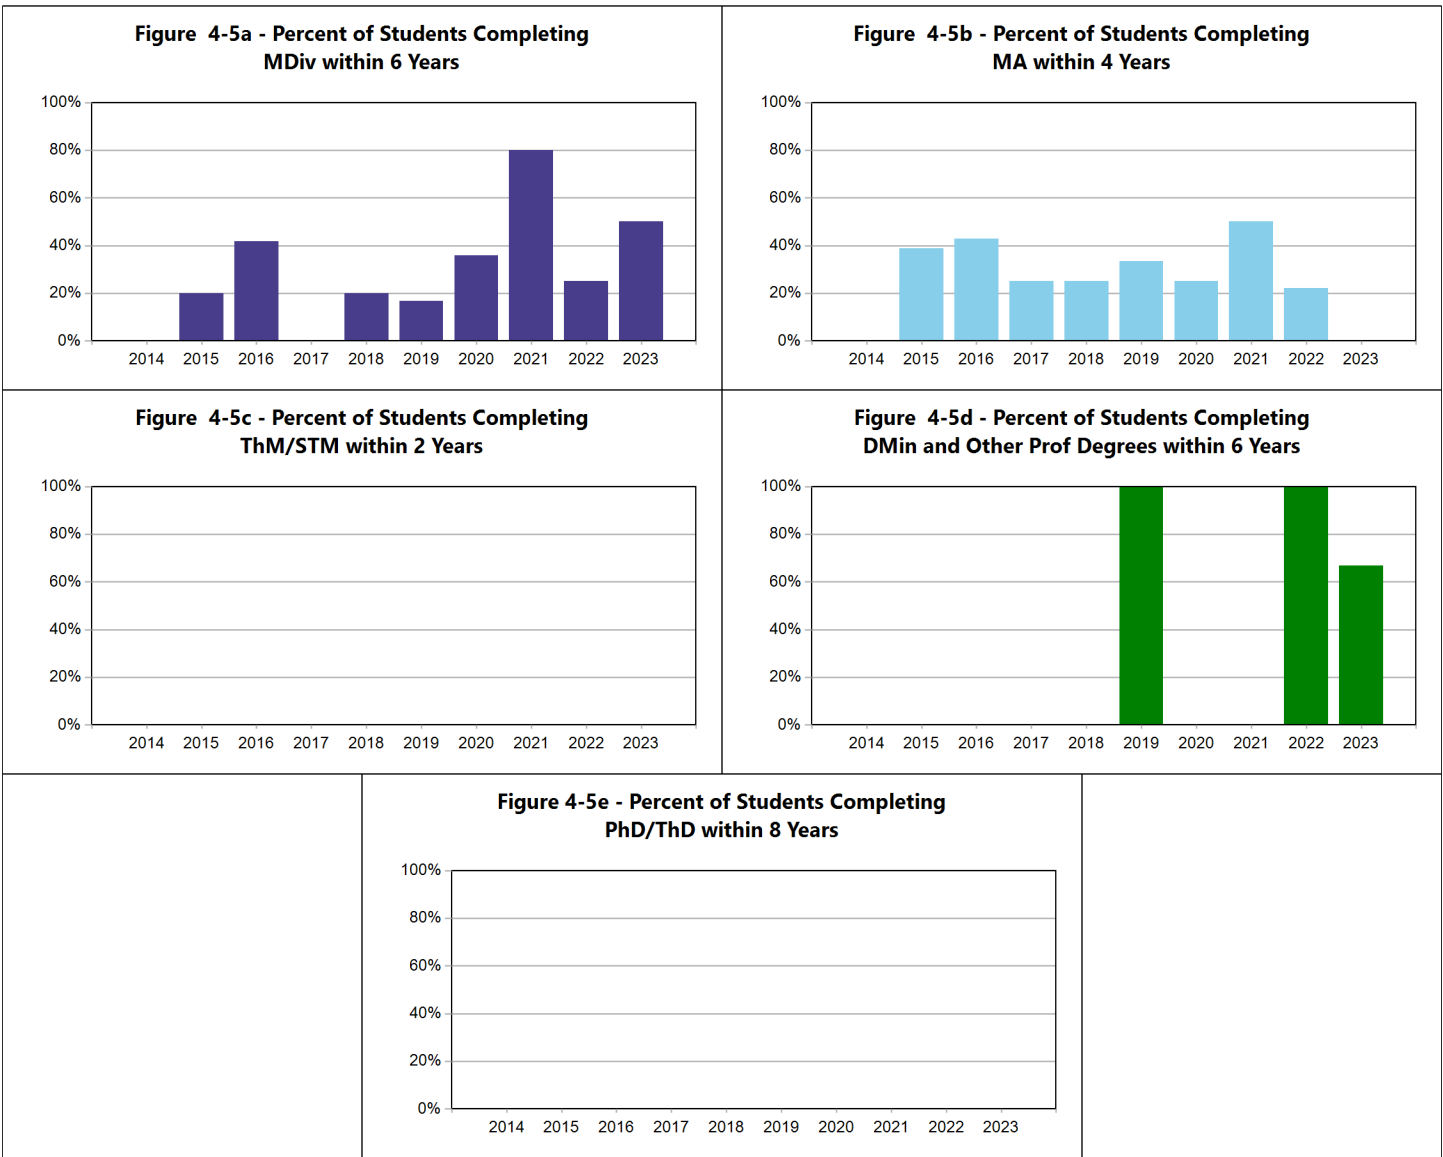

Figure 4-5a through 4-5e show the percent of students who were able to complete their chosen degree within a specified period of time which approximates two times the normal length of the degree. Please note that each chart has a different length in years that is being measured. 2015 is the first year this data was collected. Graduation rates are a helpful measure of the percentage of your students who graduate in a timely manner. It can be useful to compare your graduation rates with all other ATS schools and with those in same ecclesial family.

The Table below shows the percent of students in degrees that graduate within two times the normal length of those degrees (see the various degree lengths above). This figure also shows your school compared to the overall graduation rates of ATS schools and ecclesial families.
